EDUCATION

- Sahyadri College of Engineering & Management** Mangaluru, Karnataka
B.E. in Computer Science Engineering; CGPA: 9.52 Sept. 2023 – July 2027

EXPERIENCE

- Datavex.ai** Mangaluru, Karnataka
Project Intern Sept. 2025 – Present
 - : Engineered scalable frontend modules for an AI-Powered CRM and a multi-tenant SaaS platform, optimizing UX and application performance by implementing custom pagination and debounced search features using React.js and Next.js (App Router).
 - : Developed a multi-stage student profiling pipeline and complex workflow-oriented UI, leveraging TanStack React Query and Redux Toolkit for real-time state synchronization.
 - : Secured multi-user sessions and authentication by implementing Role-Based Access Control (RBAC), SSR cookie forwarding, API interceptors, and anti-CSRF validation.
 - : Integrated FastAPI endpoints with a custom automated email processing system and AI scoring engine, leveraging Azure OpenAI to analyze incoming inquiries and dynamically render context-aware responses on the client side.
 - : Containerized frontend applications using Docker and managed seamless deployments across various Azure environments, ensuring high availability and stable performance under heavy traffic.
 - Tech Stack:** React.js, Next.js, Redux Toolkit, TanStack React Query, FastAPI, Azure OpenAI, Docker, Azure VM

PROJECTS

- Startup Foundry**
 - FastAPI, Next.js, Apache Kafka, PostgreSQL, Playwright, Ollama, AWS EC2, AWS S3, Docker*
 - : Developed a comprehensive, role-based Venture Capital platform with tailored workflows for Founders to pitch, Admins to audit, and Investors to discover startups.
 - : Engineered an event-driven FastAPI and Apache Kafka microservices architecture to asynchronously process heavy backend tasks without blocking the main application.
 - : Created an automated AI scoring engine (7B LLM) hosted on AWS EC2 to generate objective investment ratings, utilizing Playwright for market data scraping and AWS S3 for pitch deck storage.
- PathPilot - AI Career & Academic Guidance System**
 - FastAPI, Gemini API, RAG, Automation*
 - : Engineered a responsive frontend interface for a RAG-based academic assistant, seamlessly integrating curated knowledge sources for personalized career guidance.
 - : Designed state-driven UI components consuming FastAPI endpoints, enabling low-latency multi-source retrieval pipelines for end users.
 - : Integrated the Gemini API into automated client-side workflows, optimizing data rendering to deliver structured, context-aware insights directly to the user dashboard.
- FinDad - AI Financial Guidance Assistant**
 - FastAPI, LangChain, RAG, Gemini API*
 - : Developed a conversational financial platform, combining a highly interactive frontend experience with FastAPI and the Gemini API.
 - : Built robust client-side features to cleanly display context-aware responses generated from vectorized external knowledge bases and financial texts.
 - : Implemented dynamic data visualization components to render real-time market insights fetched via backend web scraping pipelines.

SKILLS

- Programming Languages:** JavaScript, Python, Java, SQL
- Frontend:** React.js, Next.js, React Native
- Backend & AI:** Node.js, Express.js, FastAPI, LangChain, RAG, Apache Kafka, Ollama, Azure OpenAI
- Databases:** PostgreSQL, MySQL, MongoDB, Firebase, ChromaDB
- Tools & Platforms:** Git, GitHub, Docker, Microsoft Azure, AWS, KNIME, n8n
