## **About us:**

Winman Software India LLP is engaged in developing and distributing standardized software products with a special focus on income tax software for the Indian market.

The Company is offering Tax Compliance Software solutions for the past 22 years with pan India presence.

Our flagship product 'Winman CA-ERP' introduced in the year 2004, emerged as the leading tax software in just five years.

Our products' high quality and user satisfaction are evident in the fact that around 75% of our sales originate from customer referrals.

| <b>Job Profile</b>                                                                       |                                      |                        |
